ABSTRACT:

PROBLEM TO BE SOLVED: To obtain a drink composition excellent in flavor and melting in the mouth, smooth in passing through the throat, leaving nothing and having moderate viscosity.

SOLUTION: This drink composition is obtained by including in a drink an oil-in-water type emulsifying composition which contains starch particles each with a particle diameter of $>30\ \mu\text{m}$ and gels by heat reversible gel with a melting point at $\geq 37^\circ\text{C}$.
